N.Fans Business Plan

NFT Aggregation Platform
Used By People Around The World

Digital Collection

Digital Art

Non-Fungible Token

Development Background

NFT

NFT stands for non-fungible Token.

Smart contracts for such tokens have unique attributes and data; its characteristics are indivisible, irreplaceable and unique.

Artworks and collectibles are faced with many problems such as centralization of distribution, solidification of the industry model, easy piracy and counterfeiting, and the inability to guarantee fairness. With the development of blockchain technology, its data immutability, transparency, decentralization and other advantages will bring revolutionary innovation to the field of art.

- Indivisible

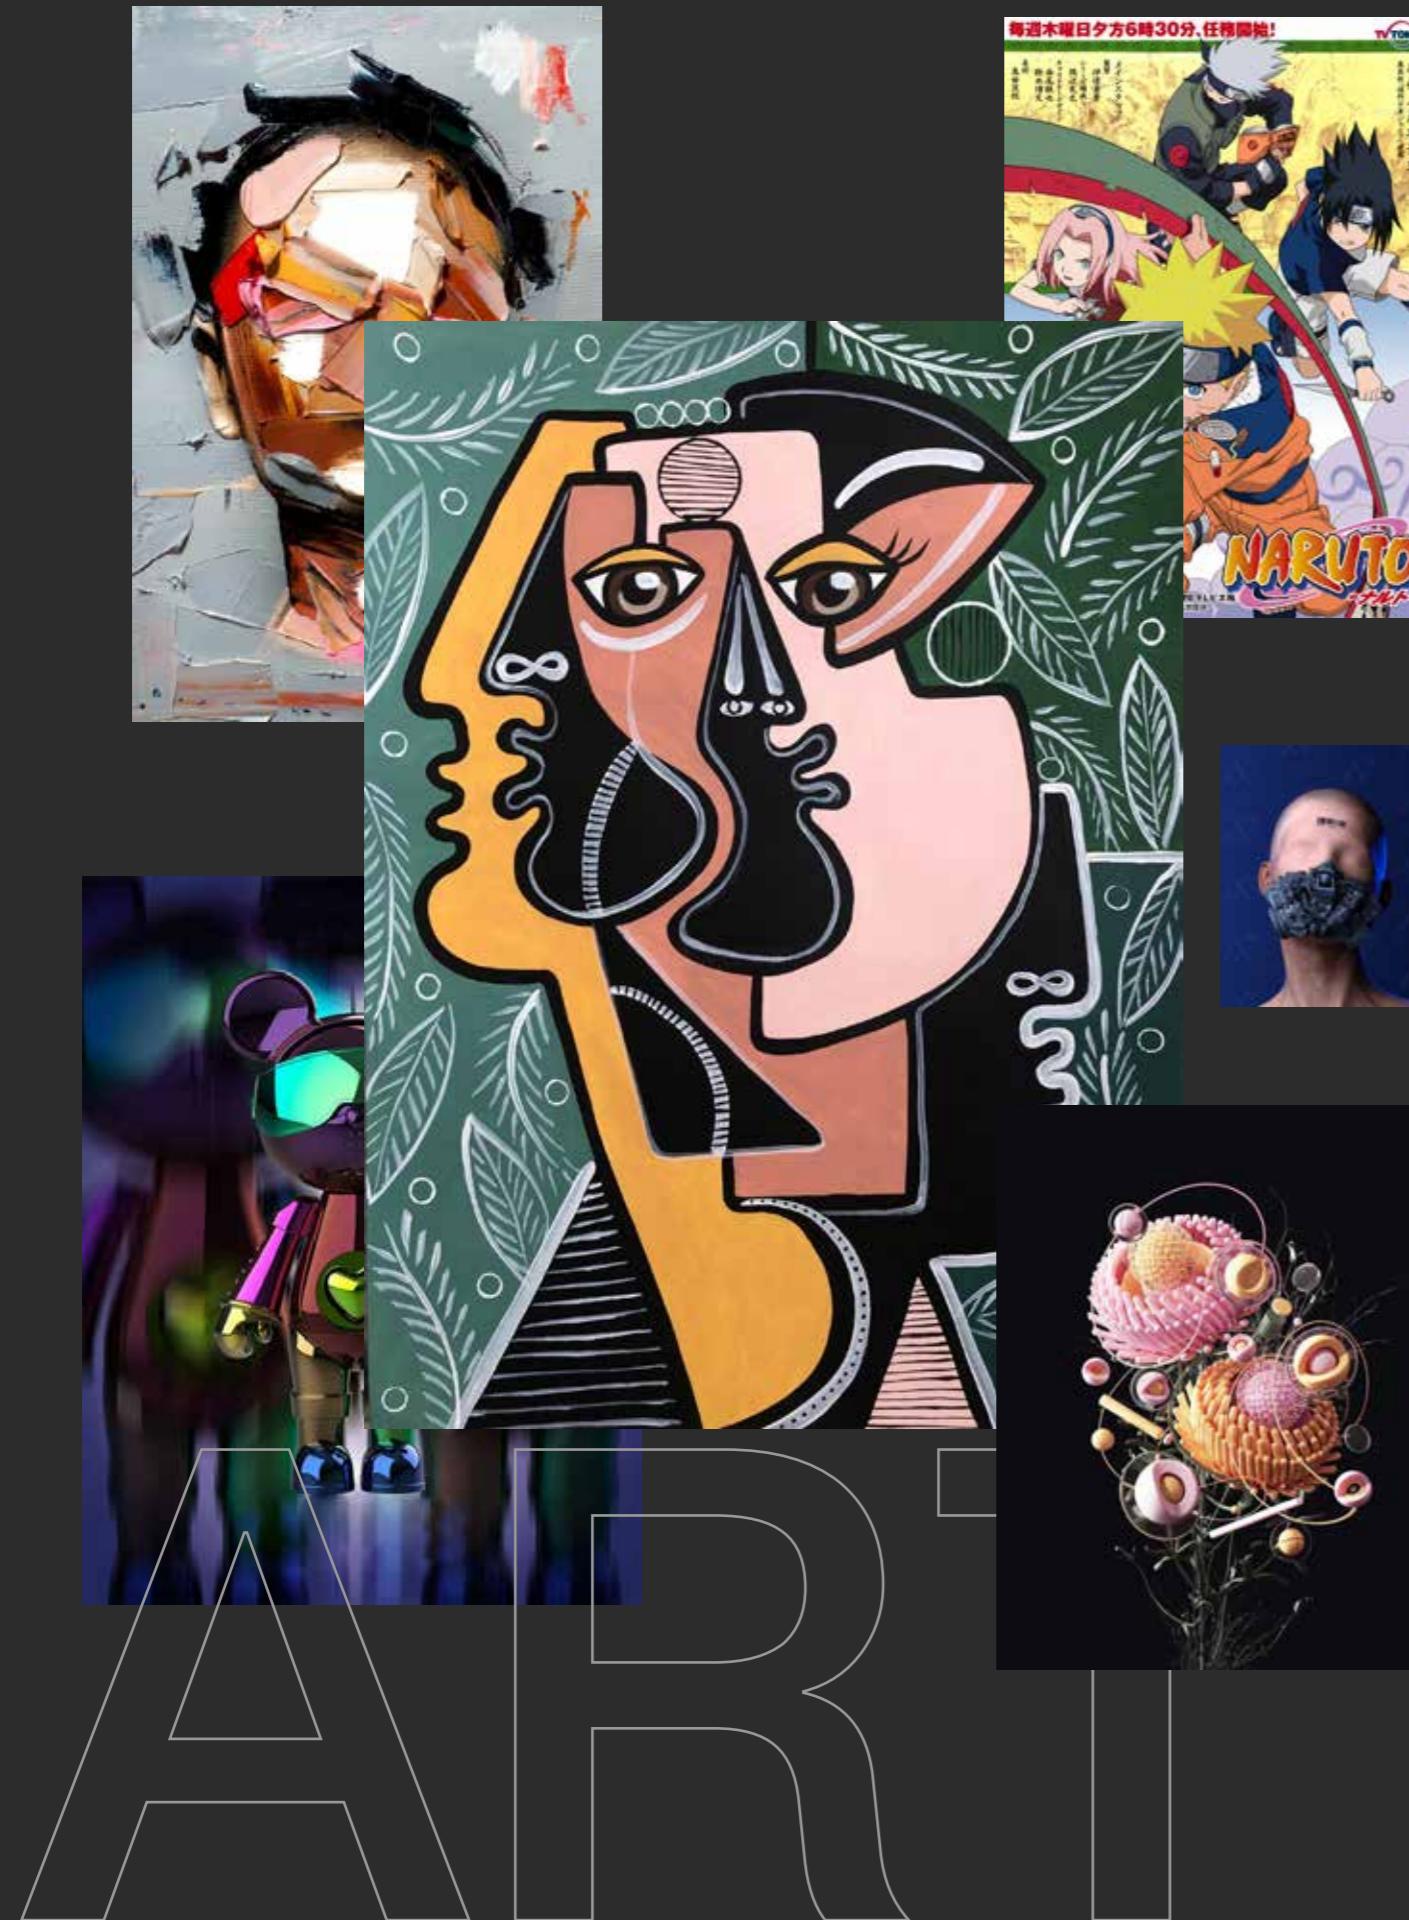

- Irreplaceable

- Unique

Digital Art

NFT

Digital asset trading platform

Non-Fungible Token

NFT digitizes the ownership of artworks. The immutable nature of blockchain technology greatly reduces the chances of counterfeiting and ensures the authenticity of digital art.

The copyright and ownership of artists' works are no longer dependent on any third party for protection, which saves costs and ensures more income for artists.

Digital Art

The NFT market is growing year by year

Total CryptoArt Value:\$647,439,236.01(244,777.614 ETH)

Total Artworks Sold:216,852

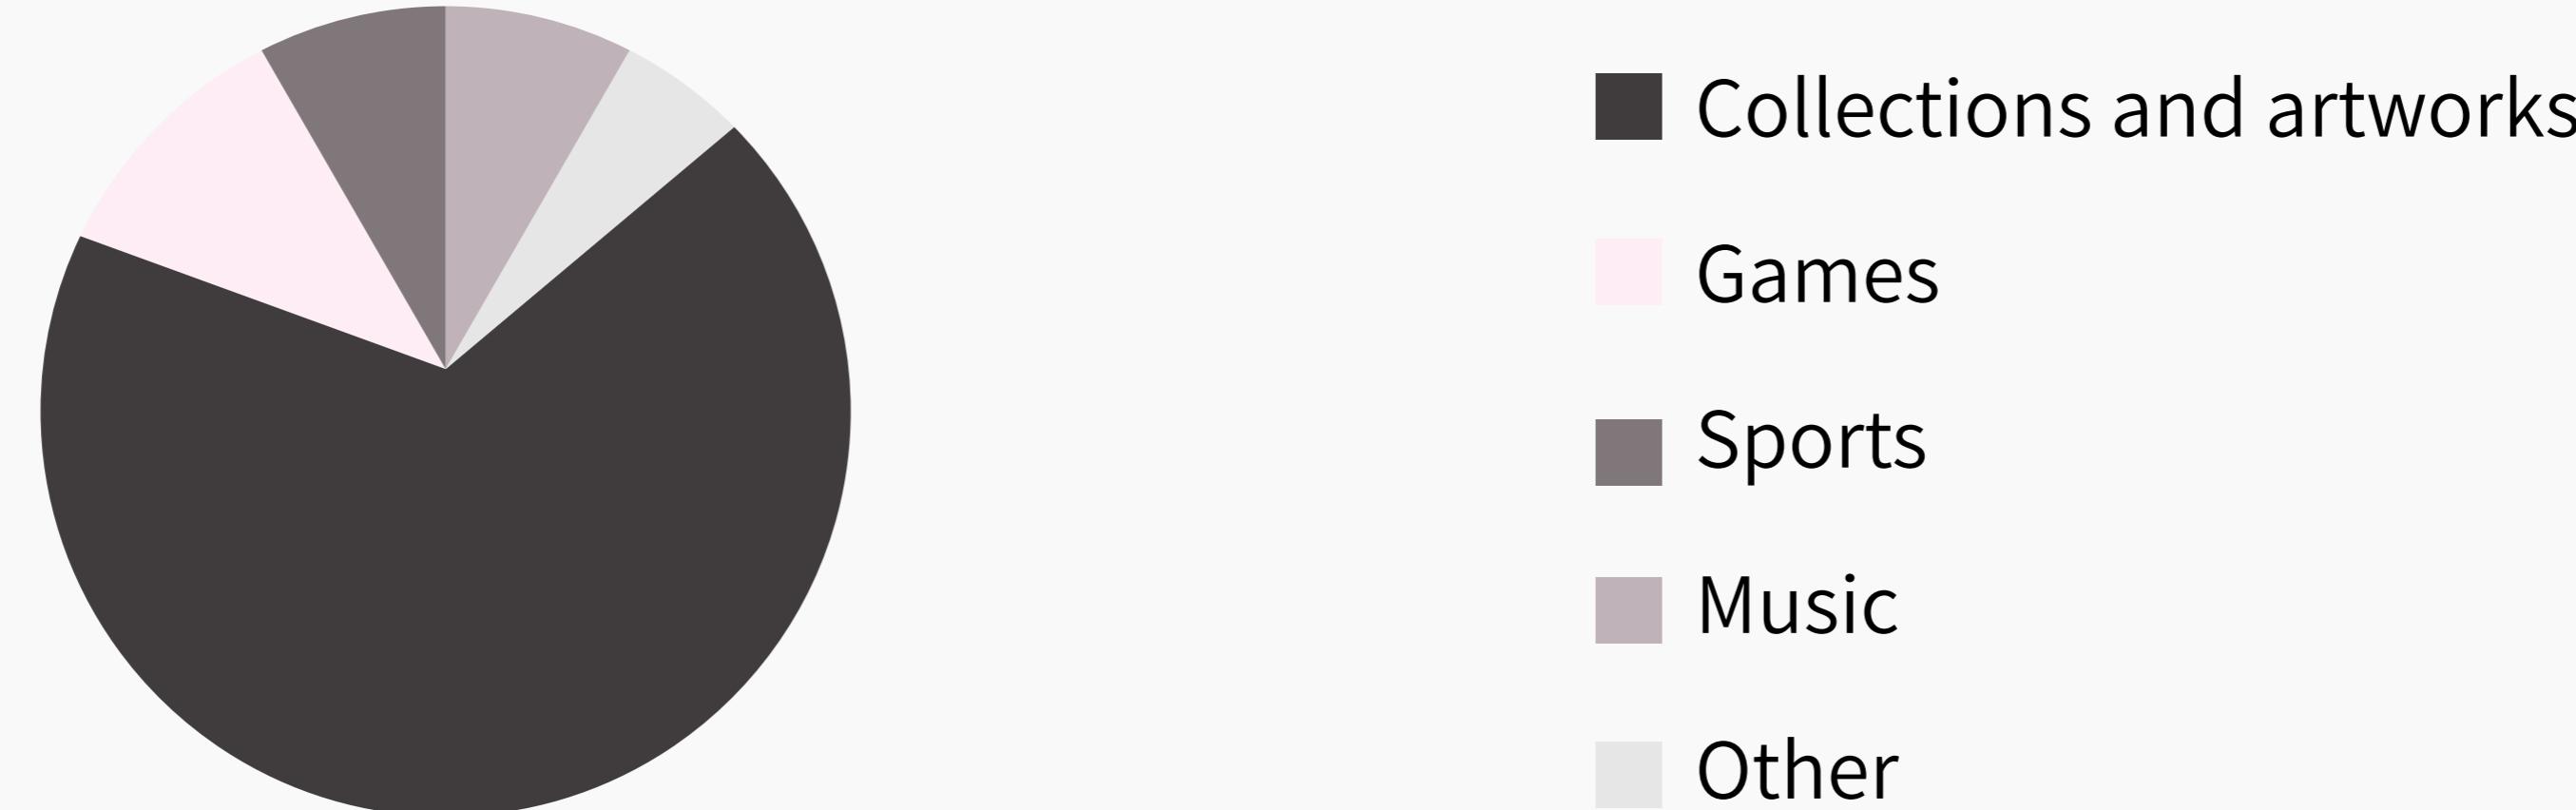

Monthly cryptoart volume

NFT Development Trend

The market trend in the first quarter of 2021 shows that collectibles and artworks dominate the main NFT markets, while games, sports, music and other NFT categories are gradually emerging.

In the past 6 months, NBA Top Shot's total market sales have exceeded 550 million dollars. CryptoPunks reached a transaction volume of 1.5 million dollars in the first quarter. Beeple, in their latest auction at Christie's Auction House amassed a price of 6 million dollars. Marking history as the first NFT music album sale, 3LAU's record \$11.6 million album heralded the beginning of the NFT era.

Percentage of NFT transactions by category in Q1 2021

What is GameFi

GameFi = DeFi+NFT+Game

GameFi = DeFi + NFT + Game. GameFi is an innovative combination of gaming, DeFi and NFTs, which is not only a new breakthrough for decentralized finance, but also the delivery of MORE application scenarios to NFTs; bringing new vitality to the whole blockchain ecosystem.

FREE TO PLAY - PLAY TO EARN

What are the Characteristics of GameFi

The GameFi genre is similar to traditional games, it includes role-playing, virtual reality, developing, combat, multiplayer, building, and more; but unlike traditional games, GameFi features:

01

The game is highly decentralized. Without a single third-party, anyone can actively participate in the development and construction of the game. Even the original publisher does not have the authority to control the development or close the game.

02

Players possess a high degree of freedom. They can vote with in-game governance tokens and participate in the formulation and improvement of game rules.

03

Earn by playing, since the game bears DeFi attributes and characteristics. In the process of upgrading and fighting monsters, players can not only have fun playing the game, but can also receive tokens, equipment, NFT items, etc, which can be used as in-game assets, or sold in the NFT trading platform of the underlying blockchain.

What is the Status of GameFi?

At present, the GameFi genre is growing rapidly and is redefining the Game world based on its community of users. The cumulative transaction volume of Axie Infinity for instance exceeded 600 million DOLLARS in July, and the one-day revenue was three times that of King of Glory. I believe that with the model of Game+DeFi, GameFi will accumulate a lot of attention and participation, and finally, explode onto the scene.

Axie Infinity, ChainRoblox and other games represented by metaverse chain games have become the growing focus of the industry. Axie Infinity's AXS has skyrocketed the GameFi concept, enabling the success of similar games and setting off a wave of "chain game fever".

Axie Infinity is a virtual workshop game based on the Ethereum blockchain which supports various virtual currencies and assets. Its digital currency AXS started in November last year, and grew by over 700 times in less than 10 months, increasing early investment value by up to +70124%.

GameFi

What is the Metaverse?

The metaverse refers to a virtual world that is parallel to the real world and is supported by technologies such as AR, VR and blockchain. In simple terms, the metaverse is all about projecting people and objects from the real world onto the chain. In this brand new world, you can do everything you can and can't do in the real world.

AR VR

Blockchain

Giant layout of the Metaverse

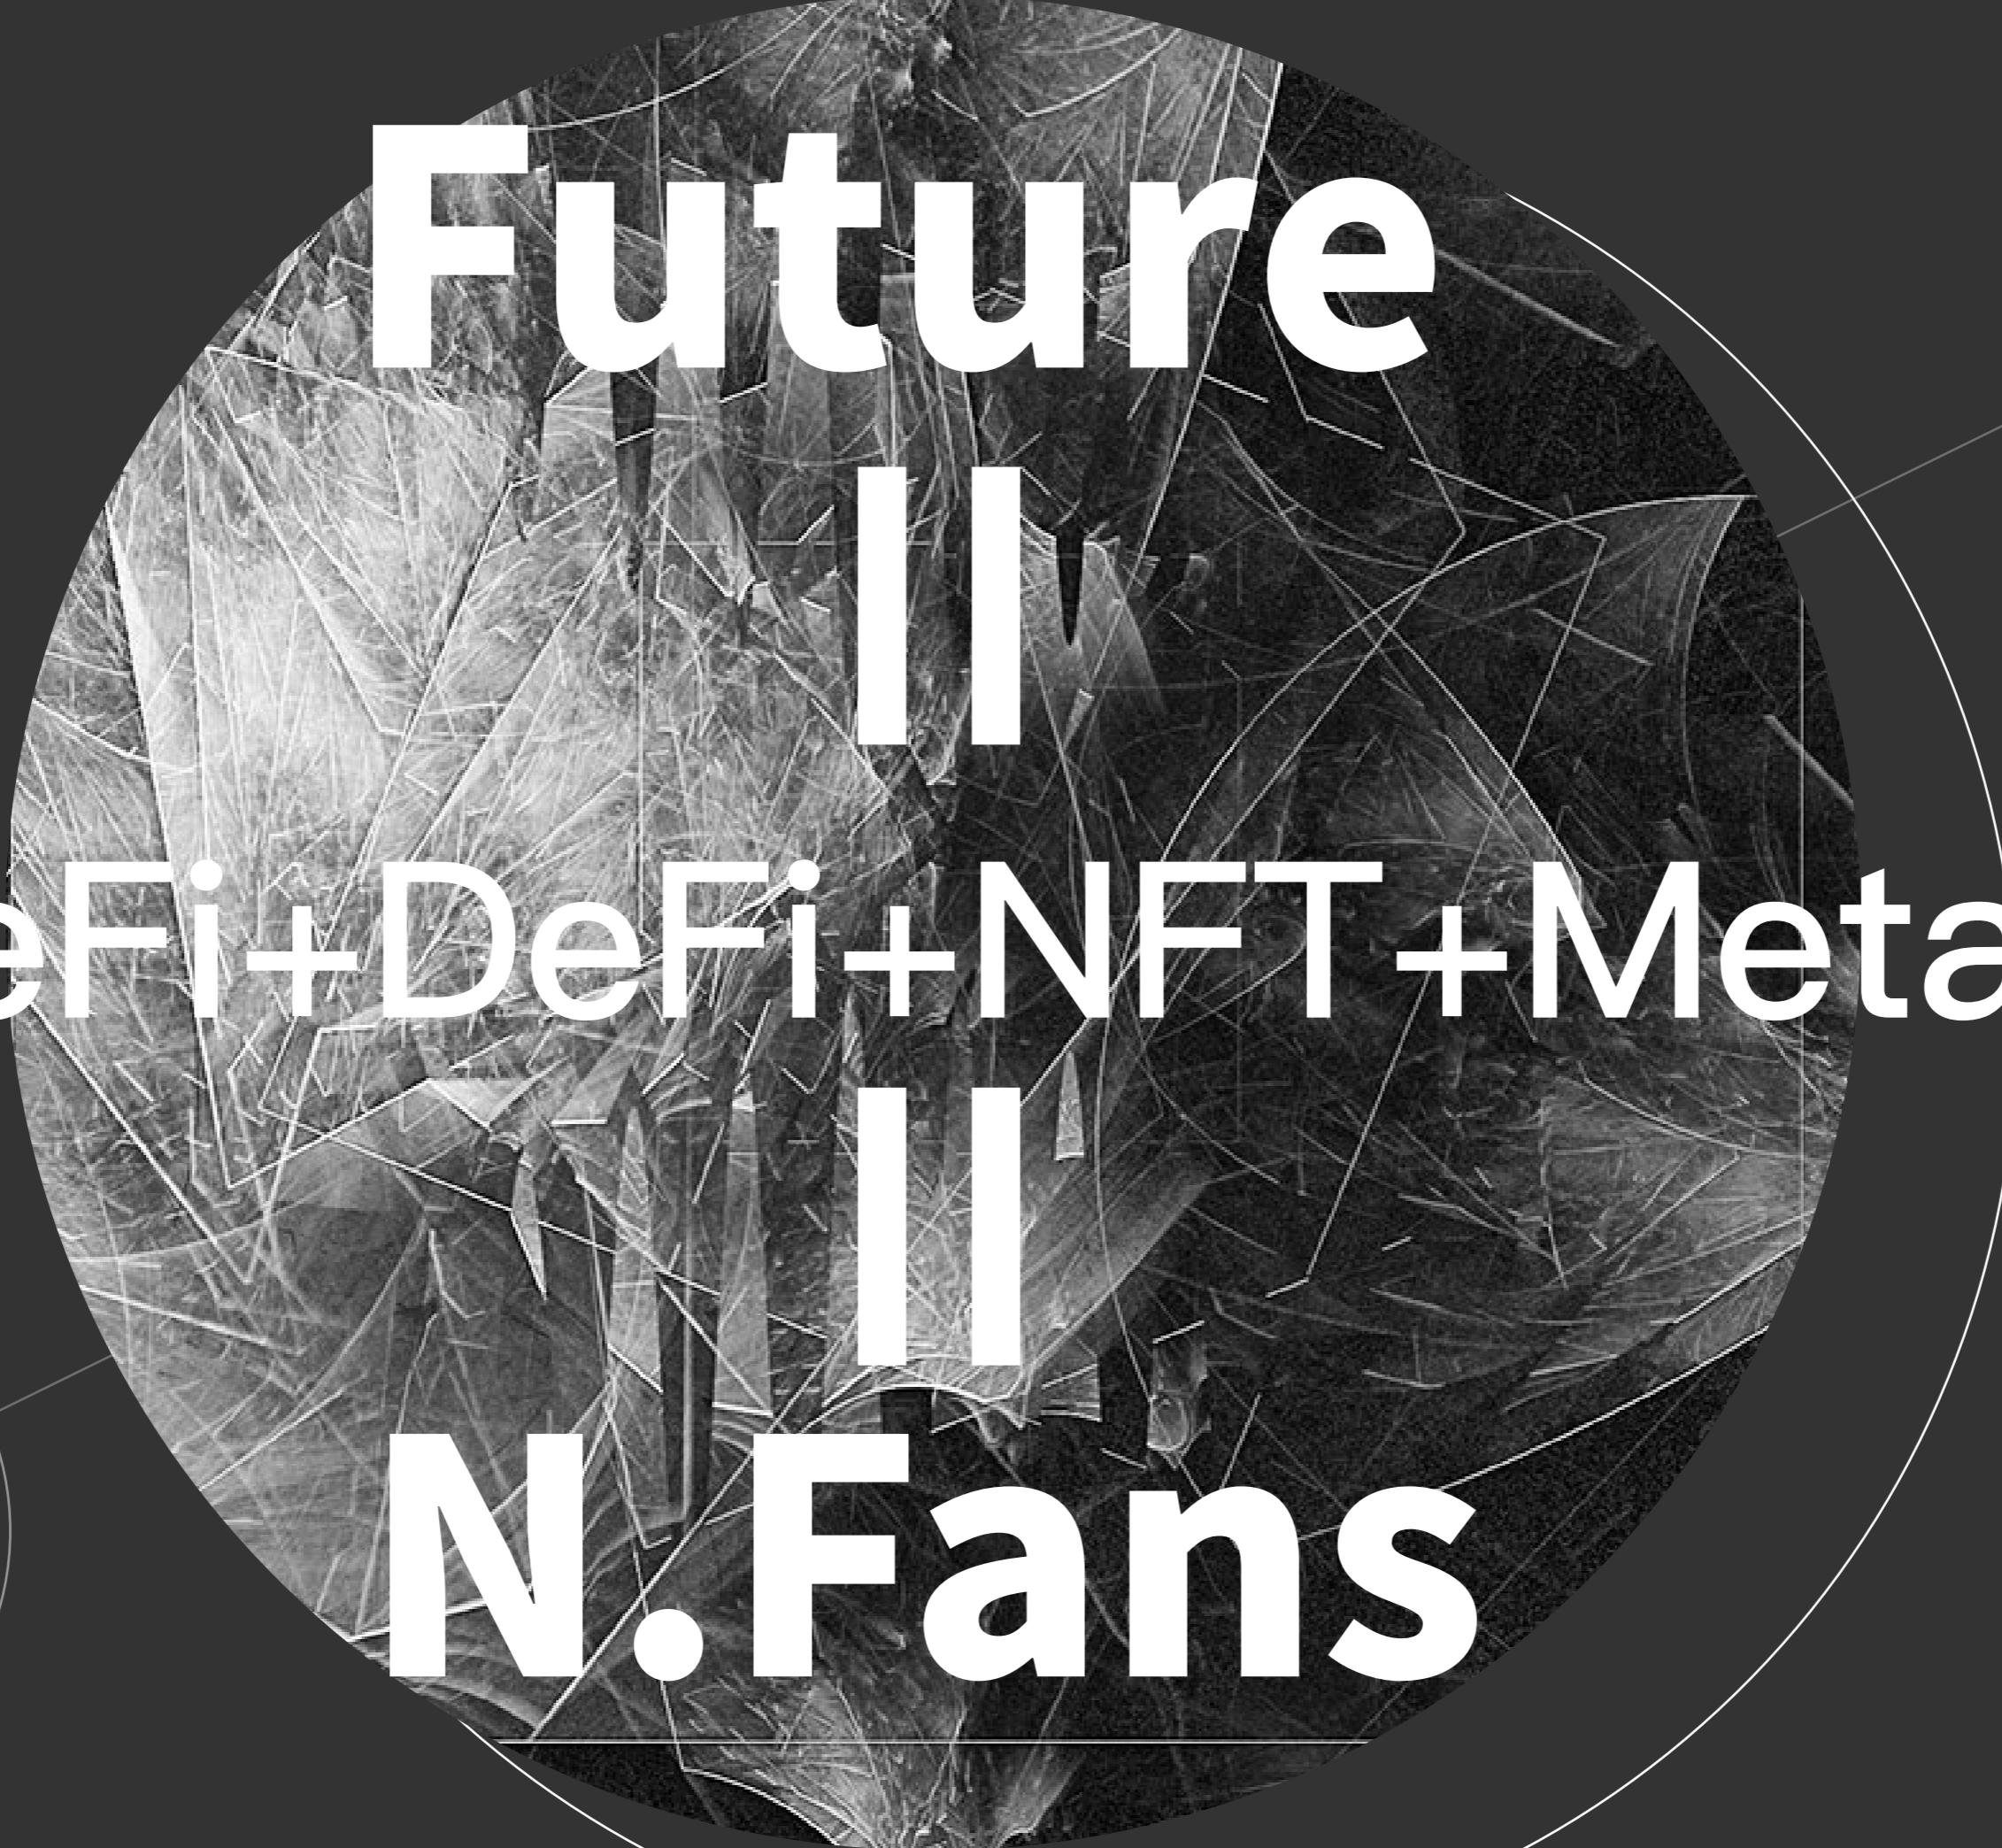

There are two main reasons why industry giants are setting up the metaverse:

1. In March, Roblox went public on the metaverse with a market cap of nearly \$30 billion, directly stirring up capital markets and causing institutions, vendors, and startups to rush in.
2. Connectivity, be it PC or mobile, is thoroughly understood by the big players, who know the industry dividend well. The concept of the metaverse is huge and could become a new source of growth for them.

In general, the metaverse is seen as a new form of the next-generation Internet; a concrete manifestation of the digital future. The giants took the lead in laying out this track, which means they will have the bigger say in the future, and become an important gateway between the real world and the virtual world.

Roblox Metaverse

GameFi+DeFi+NFT+Metaverse

**Future
N.Fans**

N.Fans Metaverse

N.Fans' metaverse is a comprehensive platform that integrates NFTs across the entire network, supports third-party game ecology, has strong inclusiveness, and a complete game expansion program. It is a milestone for mankind to move towards becoming a silicon-based civilization.

N.Fans
Metaverse

Metaverse

What can you do in the N.Fans Metaverse?

You can choose to have the skills and abilities of Naruto or any other character you like in N.Fans' metaverse, pick Nine Tails as your pet, and do you want to for the day. Options include but are not limited to:

- Having tea with friends at Mount Fuji in the morning and talking about work
- Shopping for digital and real-world clothes on Amazon
- Taking a free course on Metaverse development at the N.Fans Learning Center
- Going to a virtual Michael Jackson concert
- Parachuting from the Eiffel Tower in Paris
- Meeting loved ones who have passed away

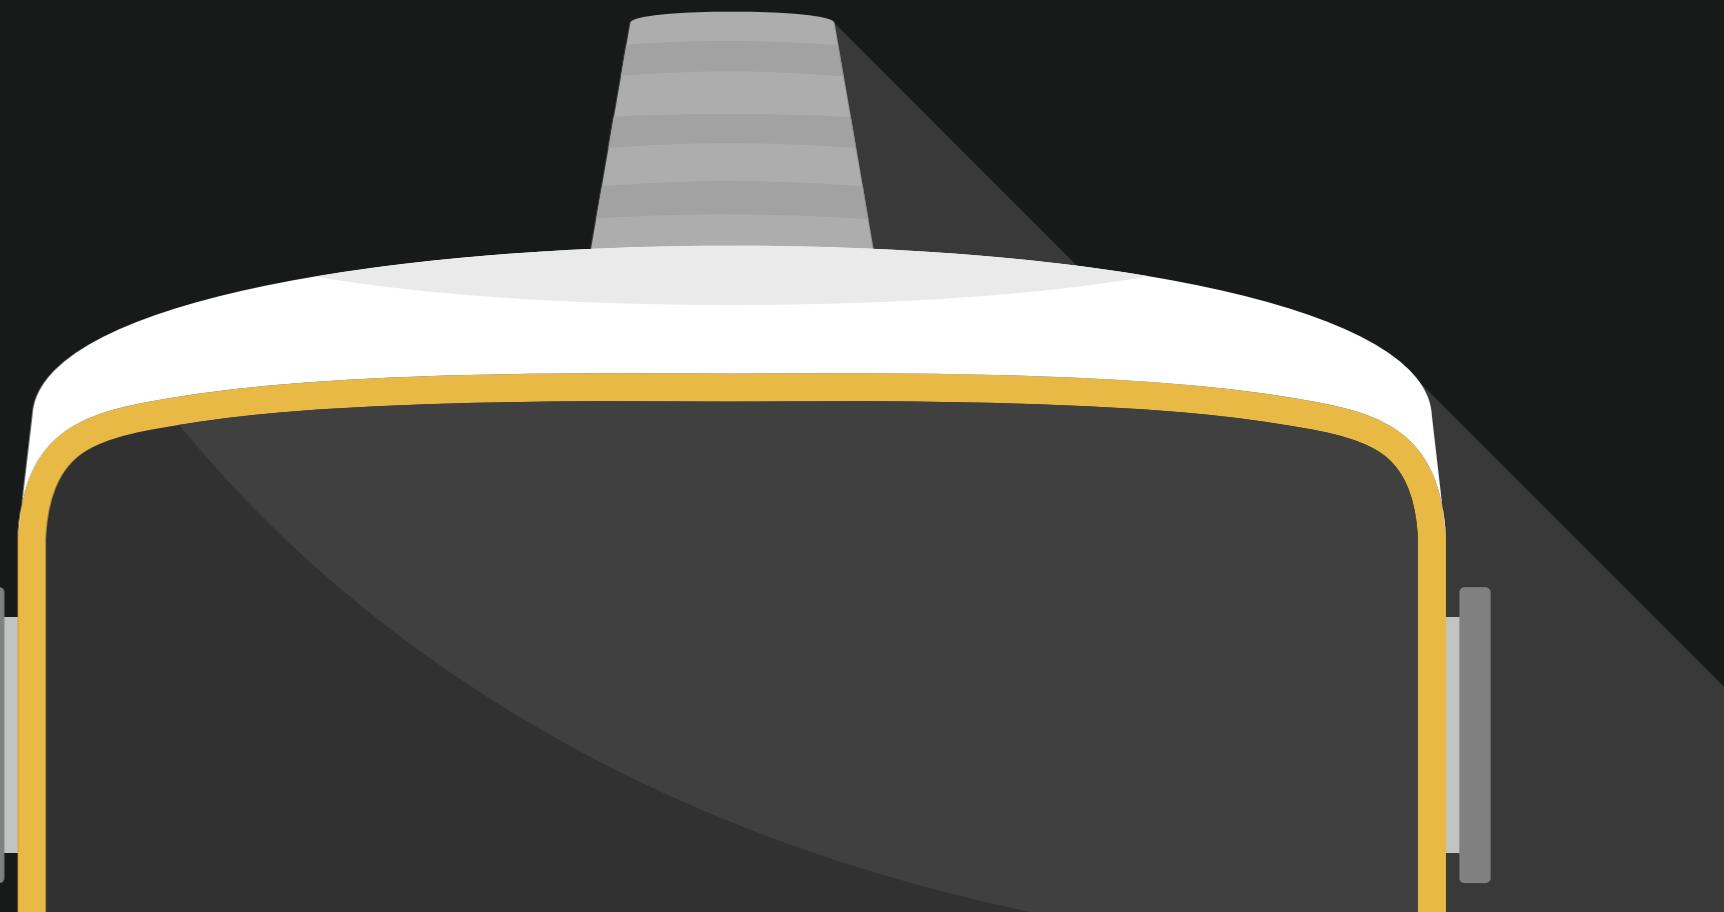

In N.Fans' Metaverse, anything is possible.

N.Fans creates an all-encompassing metaverse gaming ecosystem

N.Fans will create a metaverse blockchain game platform in the future, aiming to support a virtual space that differs from reality. Thus, human activities are transplanted from the real space to the virtual one, which is a world that can reflect that which is real, but is independent of it. VR, AI, cloud computing, 5G, microchips and other technologies will be integrated to create a metaverse-world of "immersion", "low latency" and "accessibility".

The N.Fans metaverse is an all-encompassing ecosystem of games in which everyone, both developers and players, can be a participant and realize their unrealistic pursuits, forming a good cycle in the N.Fans ecosystem.

About us

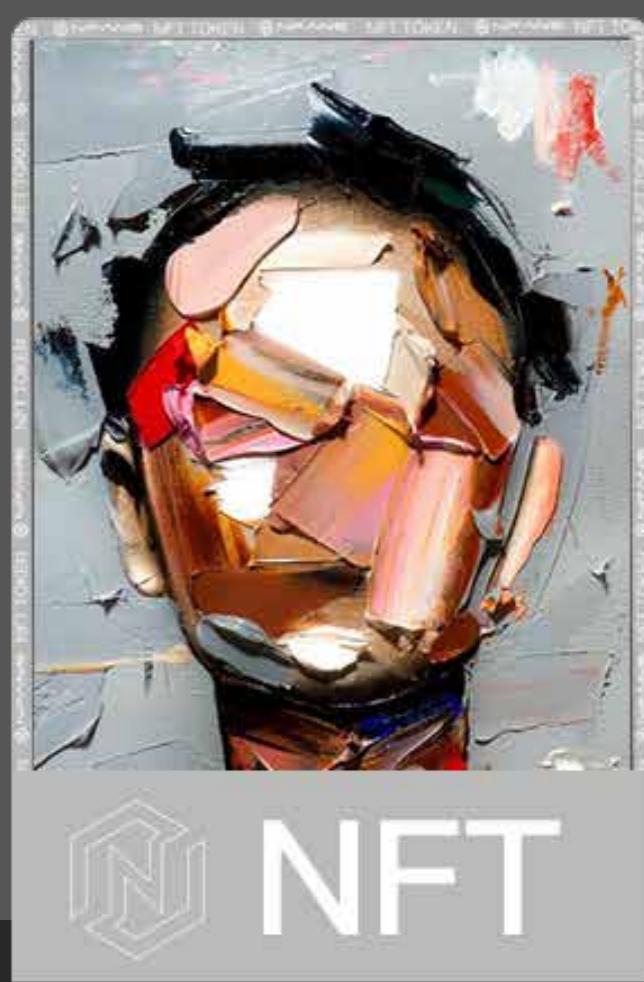

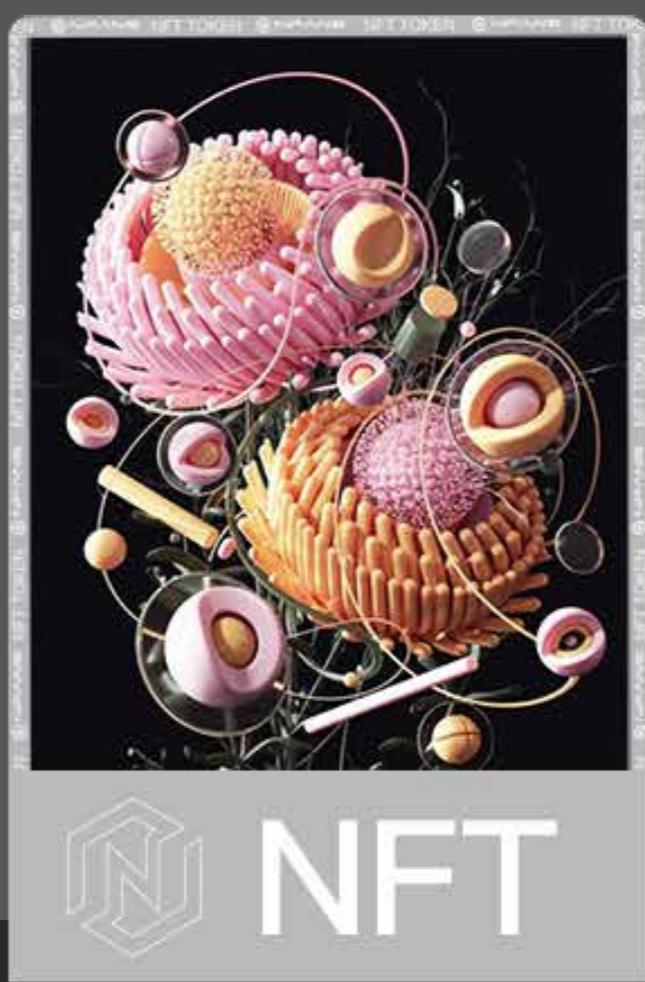

Digital Collection

Digital Art

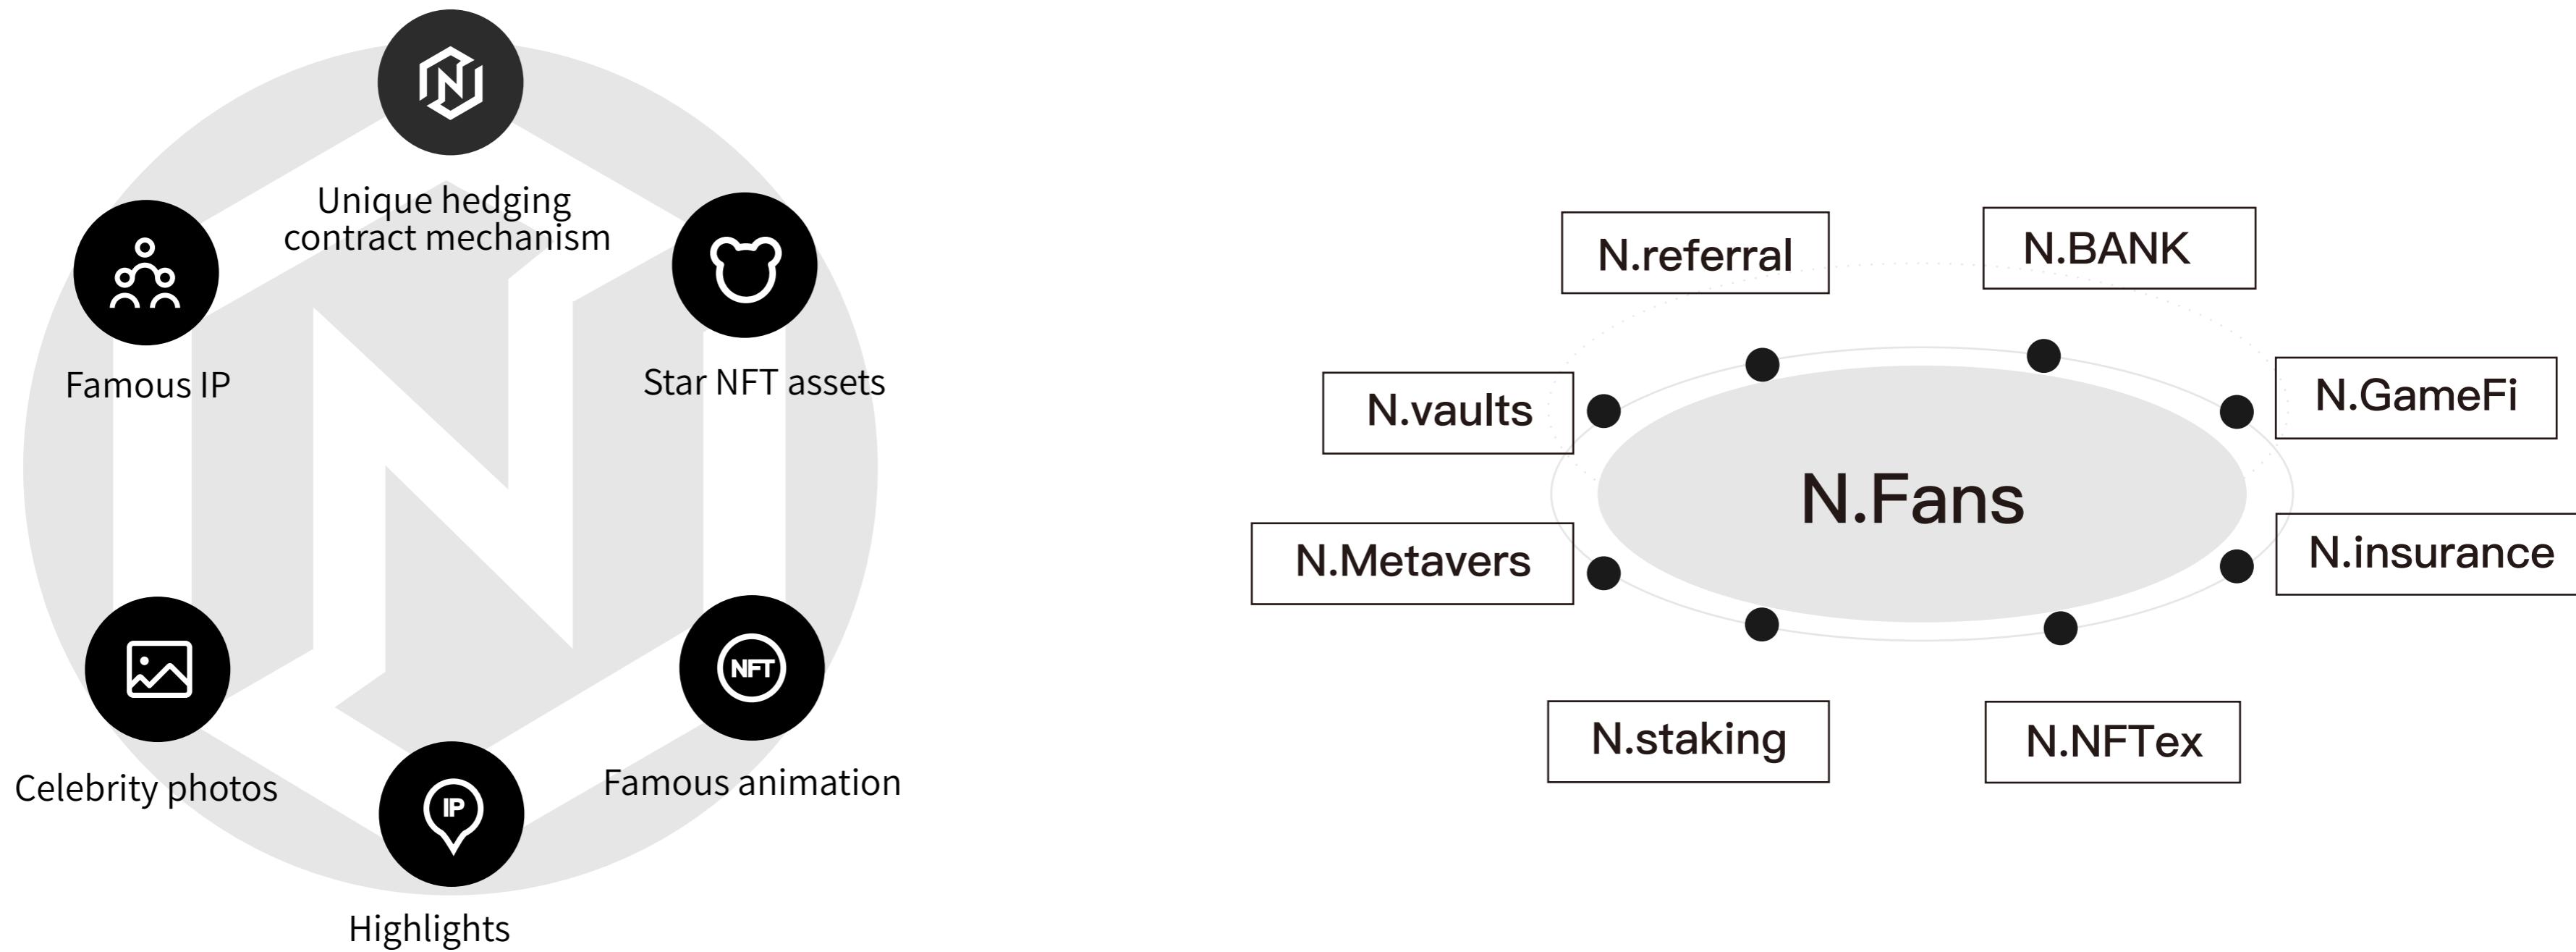

N.Fans is committed to creating a metaverse with GameFi and famous animation IPs. The platform integrates celebrity film and television, globally-recognized animation, games, and more; by utilizing smart contract technology to build copyrights that include intellectual property, products, and digital rights. N.Fans realizes non-fungible tokenization (NFT) for such purposes, and uses them to enable the circulation, confirmation and exercising of rights; in order to build a global, player-oriented aggregation trading platform.

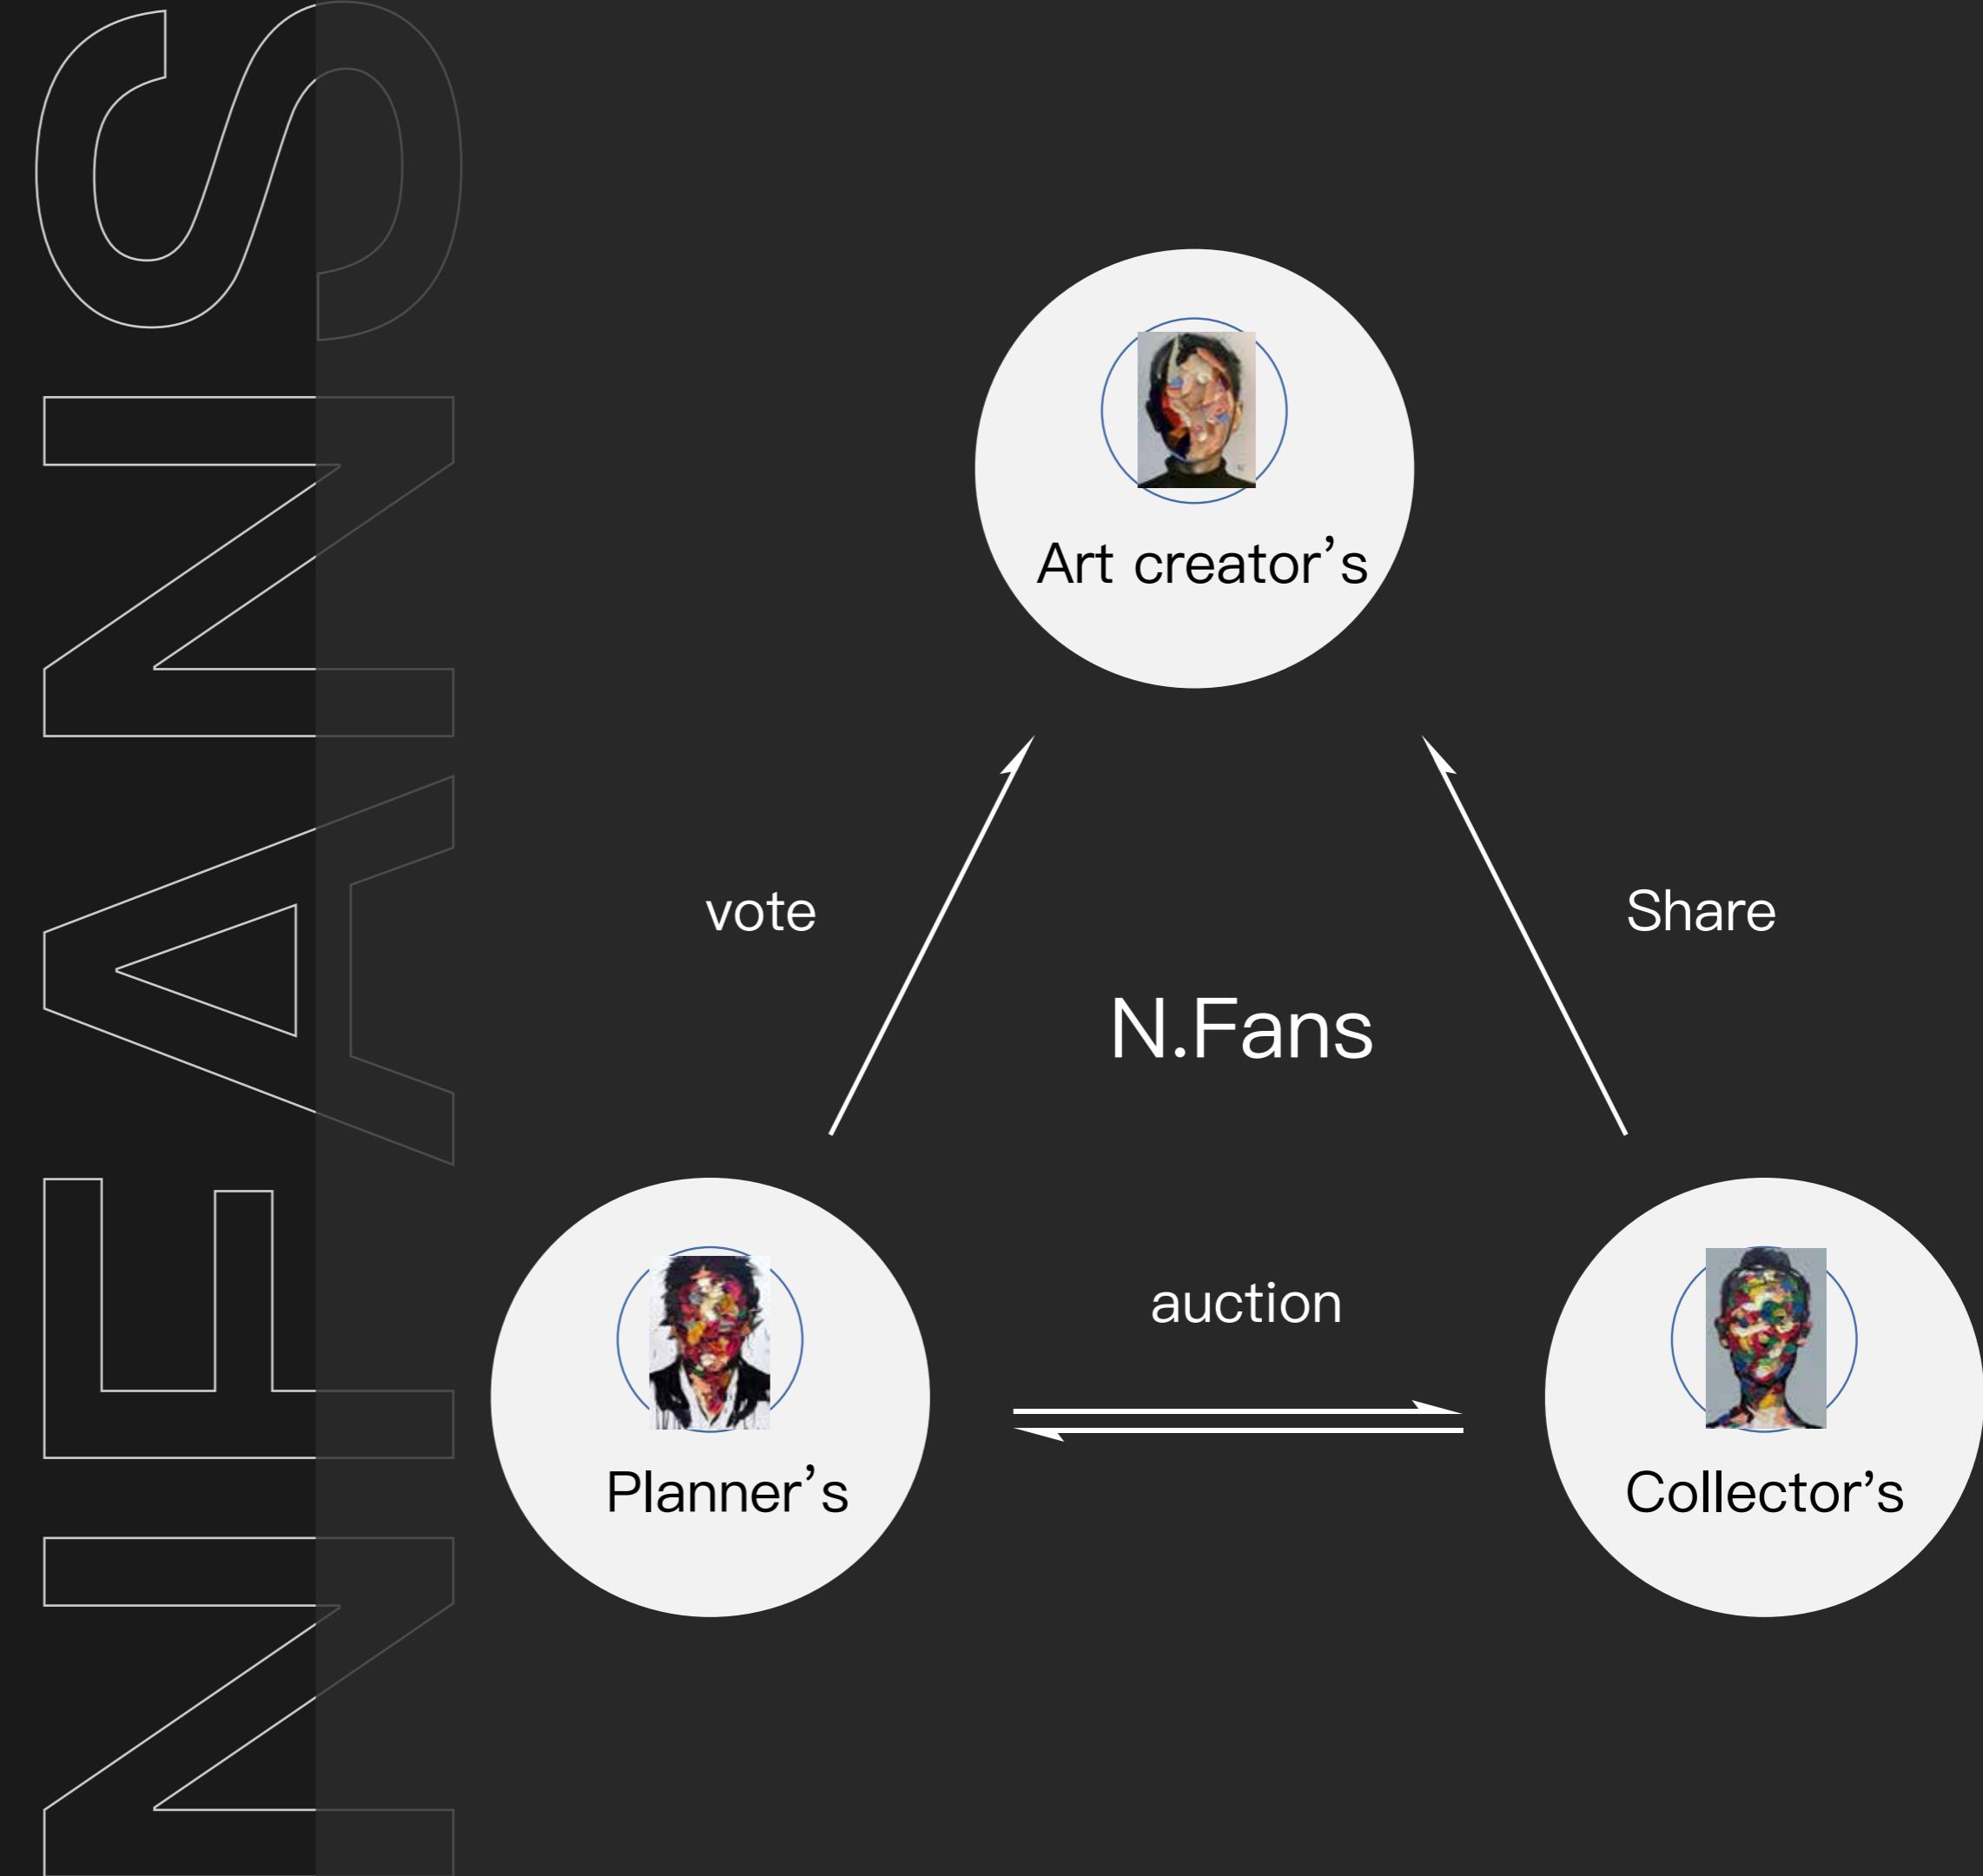

Positioning of the N.Fans Platform

The N.Fans platform is positioned to aggregate high-quality and scarce star NFT assets. This includes a variety of photos from famous artists, highlight sales, famous anime NFTs and other areas of animation. The NFT output is carried out by gathering the IPs of world-famous art, and their value is guaranteed by a unique value-preserving contract mechanism.

Understanding Human Nature NFT Aggregation Platform

N.Fans realizes the non-fungible tokenization for pop, entertainment and other subcultures to build a trading platform for global participants. N.Fans' breakthrough lies in its IP-based curation and distribution mechanism. N.Fans has cooperated with a number of well-known IP brands around the world to jointly launch the innovative mechanisms of its NFTs.

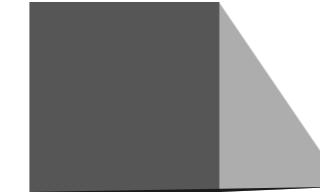

N.Fans Ecosystem of Applications

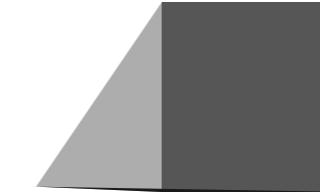

N.Fans builds a complete application ecosystem around NFTs. At present, it includes a comprehensive NFT asset trading platform, NFT asset collateralization and lending, NFT INO issuance, and NFT blind boxes.

○ Decentralized NFT aggregation protocol

NFS is an NFT aggregation protocol supported by algorithmic market making mechanisms, designed to improve the value of artworks as well as transaction liquidity. It is a perfect trading experience that enables NFT assets to achieve order flow.

○ Unique NFT hedging mechanism

NFS puts 80% of NFT artwork sales into the liquidity hedging pool through smart contracts, ensuring that NFTs sold on the platform have a unique hedging repurchase mechanism.

○ High quality NFT asset discovery

NFS offers limited edition high quality NFT artworks of global stars, providing value discovery and convenient trading and circulation functions for NFT assets.

Naoya Shimura

Asset management consultant for the ultra-wealthy, with over 10 years of project investment experience in the trade, financial, gambling and IT industries – providing all kinds of consulting services for the world's 1%. At present, he serves as a director of the Energy Development Corporation, where he is responsible for asset operations and coordinating business cooperation with various government agencies. He also operates several companies in Japan and Singapore.

Iwao Oshima

Business consultant and professional investor. The founder of one of Japan's largest banks and fintech companies, with 12 years of industry experience (B2B marketing / native applications / e-commerce / websites / games / networking / IT infrastructure / livestreaming) in Malta, Singapore, Australia, Korea, China and Estonia; carrying out asset operation, international business consulting, system development and STO consulting services.

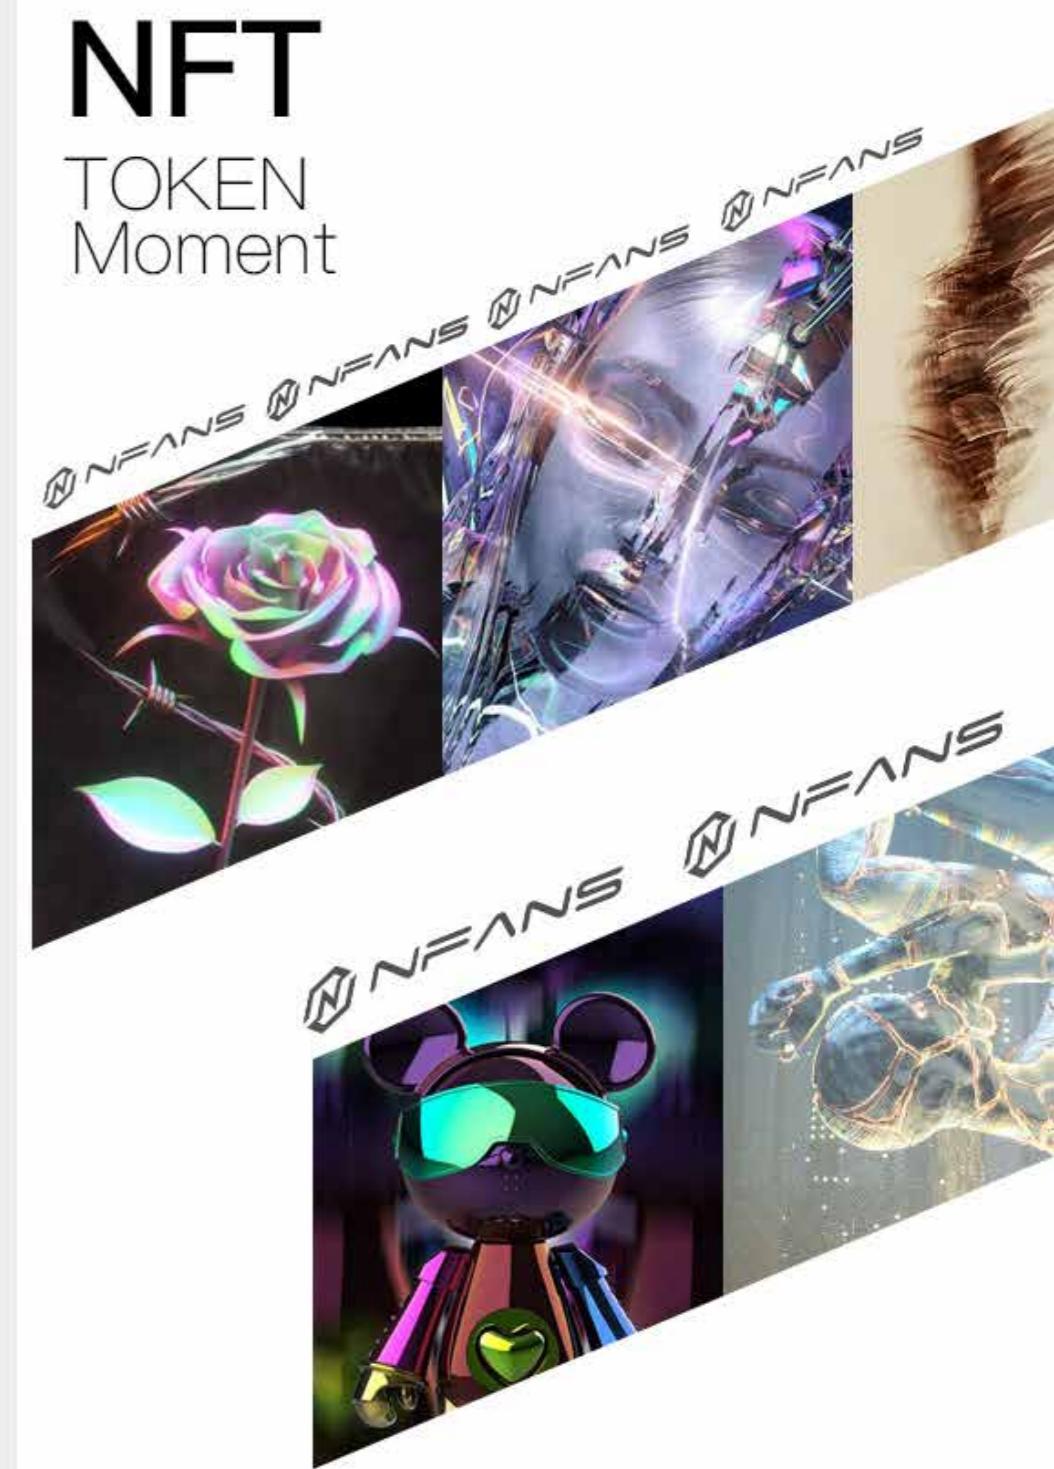

World-re- nowned IPs Combining Forces

Digital Collection
Digital Art

N.Fans
Cryptocurrency

N.Fans joins forces with world-famous IPs

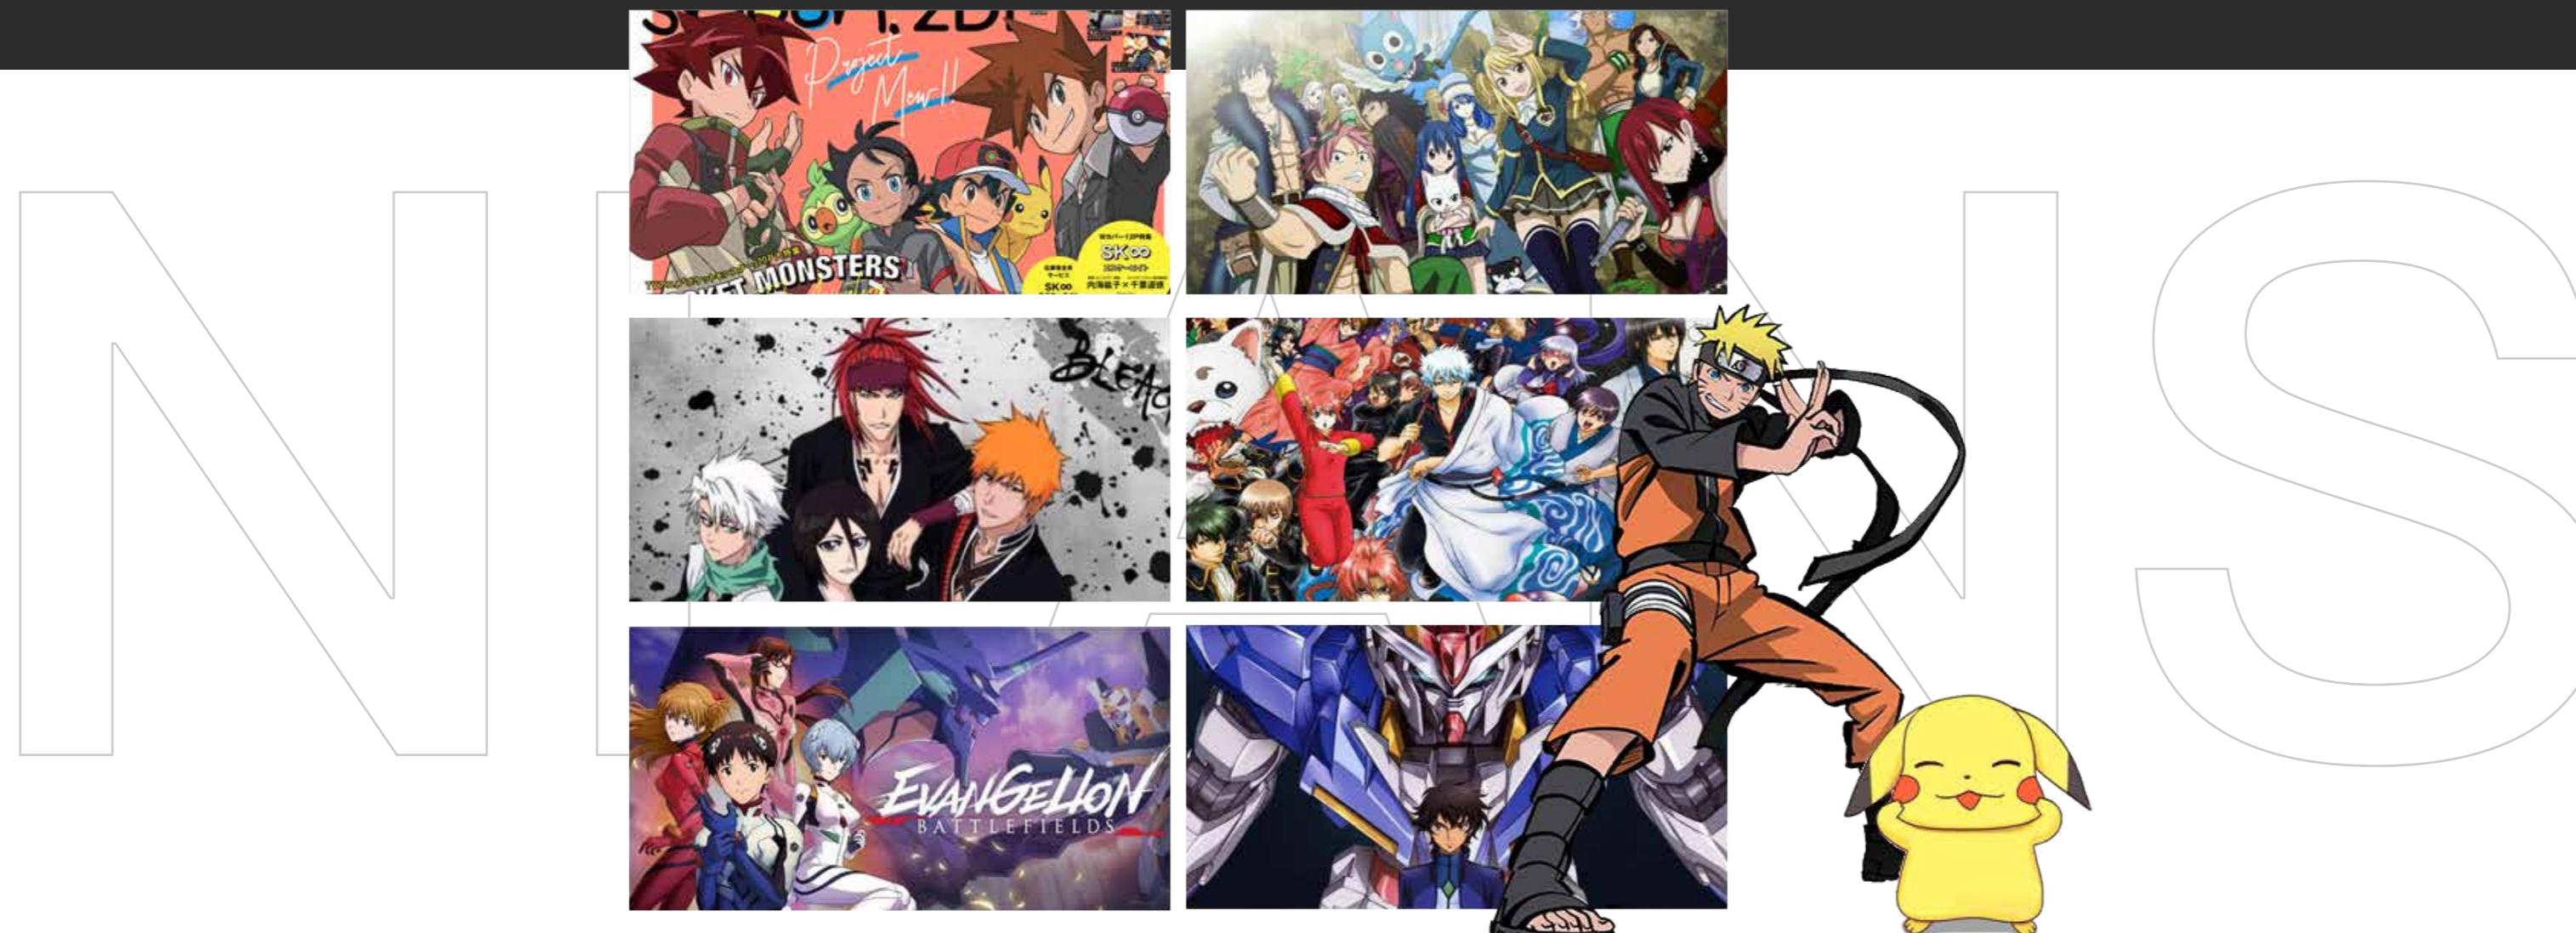

- Licensed by TV TOKYO Corporation, the Naruto IP has settled in N.Fans
- Blind boxes deployed on DODO have caused panic buying across the entire network.
- At present, N.Fans is led by Krypto Fund, ETFDAO Fund, DF Capital and other investment institutions.
- Strategic cooperation with Bandai Namco and Aibex Group.
- Naruto launched on the iBox platform with the release of 7,997 NFT blind boxes – they were all sold out in a minute.
- N.Fans, Binance NFT and Bandai Namco jointly launched the Anjie Shenshi NFT, which got sold for over 600% the initial price.

Investment institutions

- Krypto fund
- ETFDAO fund
- I-FreekMobile
- Keys Capital
- AC Capital
- Hoo Cub Fund

TV Tokyo's IP will enter in succession

TV TOKYO is currently the television station that produces the most animation IPs in Japan, and is well-known for its variety of shows; among them are: "Natsume's Book of Friends", "Pokémon", "Neon Genesis Evangelion", "Keroro Sergeant", "Hamtaro", "Naruto", "Reaper", "Gintama", "Naruto Shippuuden", "Tutor Hitman reborn!", "Fairy Tail", "Charge 21", "Dare to the Sky", "Sunny Pig Pig", "Princess Lijia", "Guardian", "Sweetheart", "Pretty Rhythm", "Game King", "BORUTO–Naruto New Generation –" all of which have been broadcasted on TV stations all over the world. The protagonist "Pikachu" of "Pokémon" is also the mascot of the station. Many areas in Japan do not have TXN member stations, so residents in these areas generally need to use cable TV to receive the program signals of the closest local TXN member station.

At present, it has signed contracts for *Naruto*, *Anjie Shenshi* and *Chen Ling Ji*, with other animation IP works to be presented successively in the future.

N.Fans + Chen Lingji -- mutual empowerment Creating higher collection value in the NFT field

Advantages of N.Fans

With very powerful, top NFT stream platform resources, media and community users, we will jointly create IP diversification of Chen Lingji and launch new NFT products.

Introduce the IP of Chenlingji to the ecosystem to garner more attention and fans.

Chen Lingji IP advantage

An IP created following an original and national style. Dominated by the nine kingdoms of Lingzhou in the sky, the positioning and world view established within is comparable to that of "Game of Thrones". The unique Chinese national-style theme constructed by the fantasy giant mecha Xuanbing; the work, the country, the props and other settings are very suitable for adaptation into games, film and television works, and the income and benefits derived from their development are considerable.

N.Fans + Anjie Shenshi -- IP linkage

The "1+1 is greater than 2" effect

Anjie Shenshi IP

Original local IP currently available in the form of novels, animation, radio drama and more. As a key project of Bandai Nan-gong Dream in China, we will obtain more massive art materials (2D+3D), which can be directly used for gamification and peripheral use. N.Fans' IP and the Anjie Shenshi IP are linked together to cast a joint NFT, making it more valuable for collection purposes.

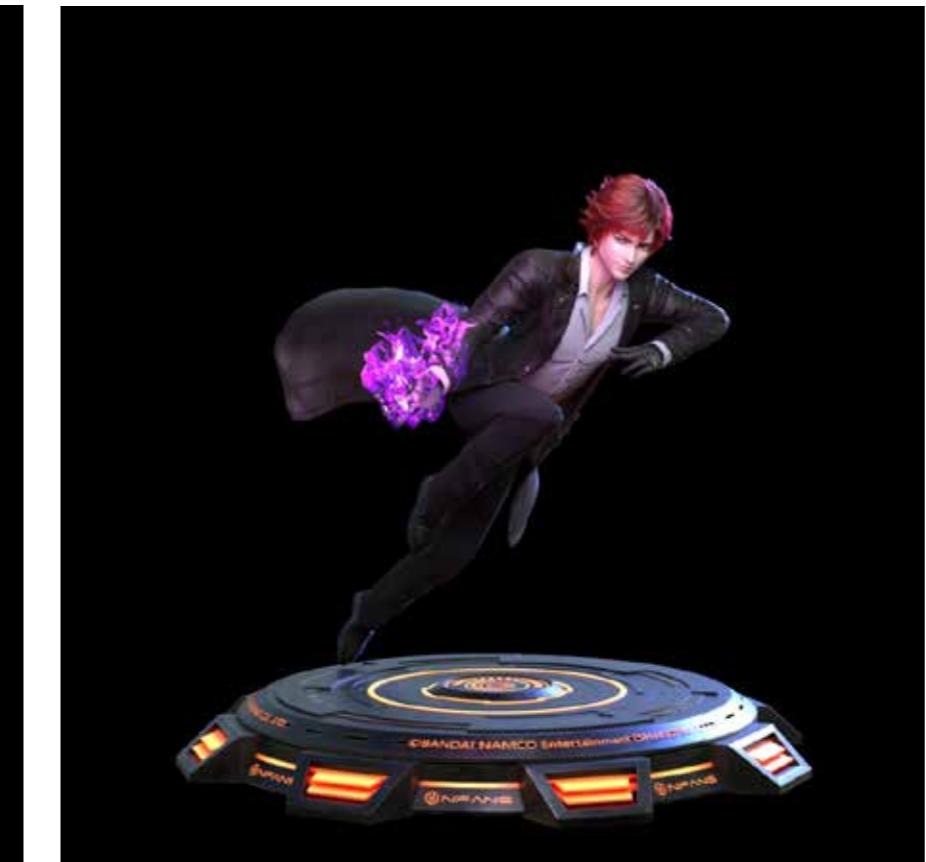

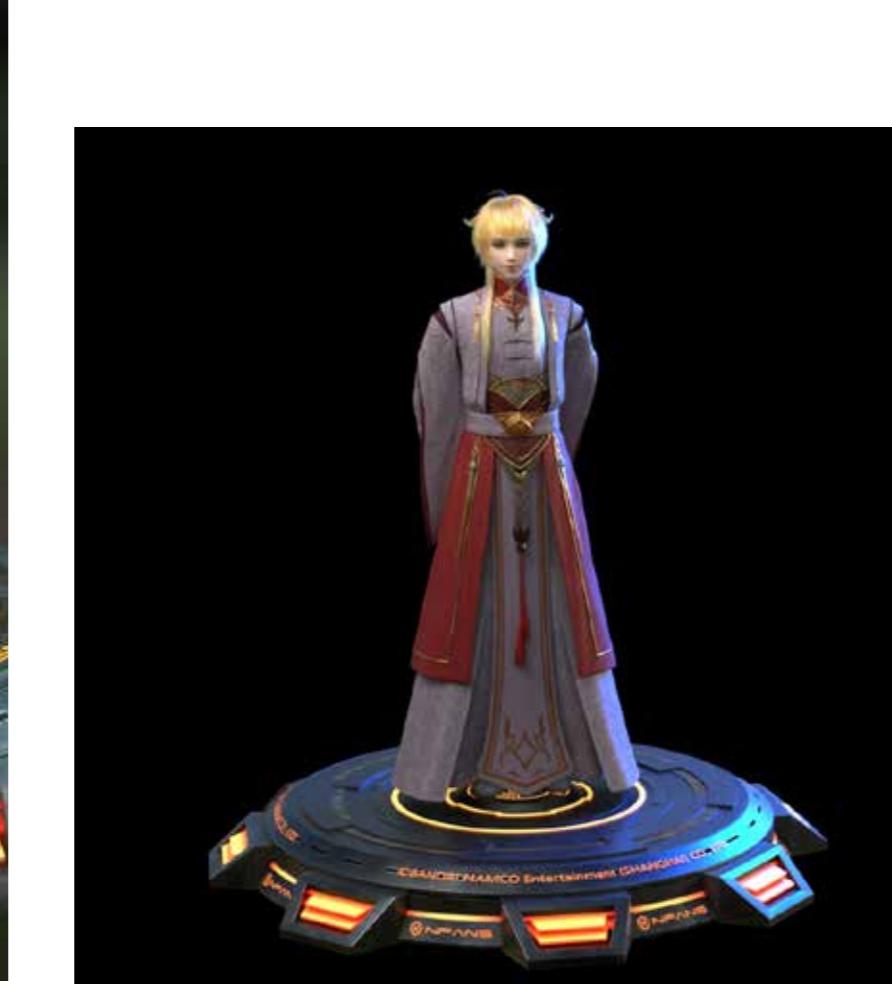

NFT

N.Fans produces handcrafted 3D products and continues to launch on top-tier trading platforms

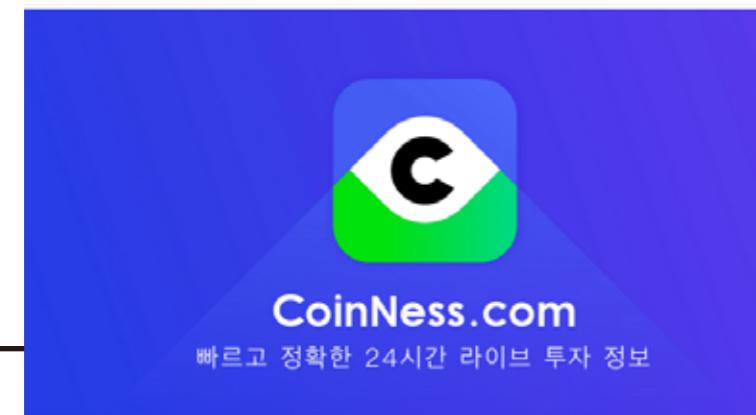

(Including OpenSea, Binance NFT, iBox, DODO, etc.)

The 3D creation process utilizes film and television production teams to achieve a next-gen production level.

N.Fans popularity and promotion

Cooperate with communities and media organizations to conduct AMAs, increase airdrop distribution and improve user interaction.

PVE & PVP

Game introduction

The Road to Ninja gameplay modes

PVP

Players can play card battles against each other, and upon agreeing to battle, both sides prepare to fight. CKR (Chakra) bonuses are distributed at the end of every match according to the results; the winning side gets more CKR, and the losing side gets less.

PVE

The game has many wonderful stories and plots built within it, awaiting to be experienced by players. The levels can be quite a challenge, and the higher they are, the stronger a player's cards must be to possess the combat effectiveness to complete them. You can earn CKR (Chakra) bonuses for each level you pass.

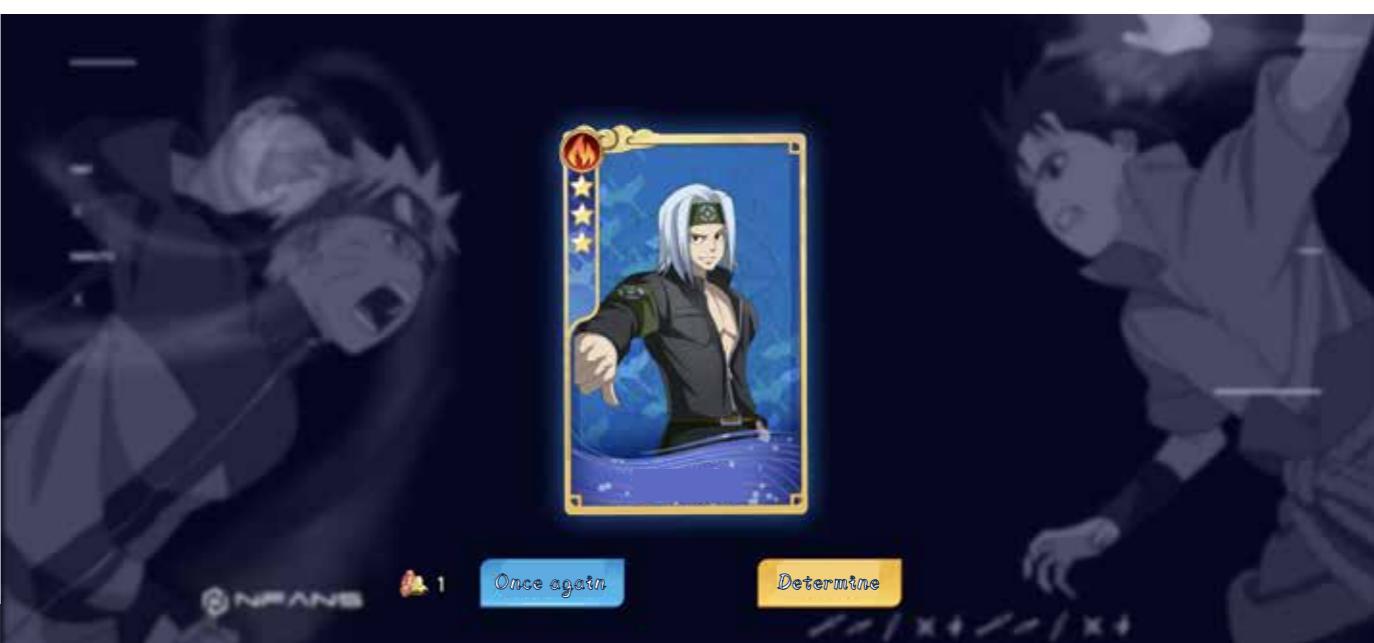

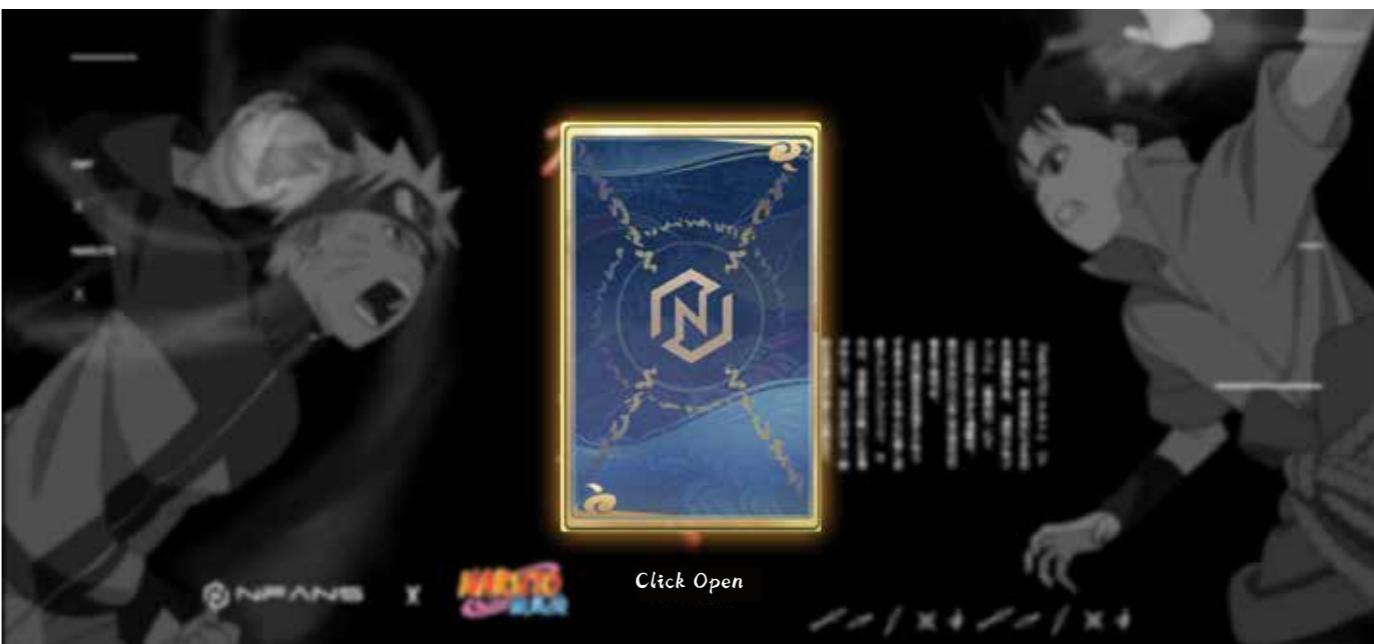

The Road to Ninja

Game introduction

How to obtain cards

- By purchasing Ninja Path blind boxes from platforms such as iBox, BinanceNFT, NET or any other platform where N.Fans NFTs are featured. With this method, players can exchange any of the card characters according to their quality.
- By playing the Ninja Raiders League game for a chance to get a card drop of various qualities.
- By P2P (peer-to-peer) trading or transferring NFTs on platforms like iBox that support such features.
- Use 1 reel to draw one card, and consuming 9 reels can draw 10 cards
The probability of cards drawn is based on the card level, which ranges from 1–4 stars; the higher the star, the lower the probability of being drawn

The Road to Ninja

Game introduction

Perfect card development system

The Ninja attribute of Shengxing will be comprehensively improved

- Includes upgrades, breakthroughs, star upgrades and equipment enhancements
- Upgrading requires NFS and experience, and is performed to increase combat power
- New skills can be unlocked by raising the star level, and new skills can be obtained for each star

Card quality: One, two, three, four, five, and six stars
1 to 3-star cards can be acquired by drawing cards, blind box exchanges, off-site purchases of cards or playing the 'Ninja Raiders League' game. For 4-star cards and above, acquisition is done through synthesizing cards.

Card level:

All cards start out at level 1. If a card is upgraded through synthesis, the upper limit of the card level is increased correspondingly. For example, if a 3-star card is drawn from a blind box, the Raiders game, or other acquisition methods, the resulting upper limit of the level can reach 20, and 1-2 star cards will not be required to be synthesized.

The highest level is 15

The highest level is 30

The highest level is 45

The highest level is 60

The highest level is 70

The highest level is 80

The Road to Ninja

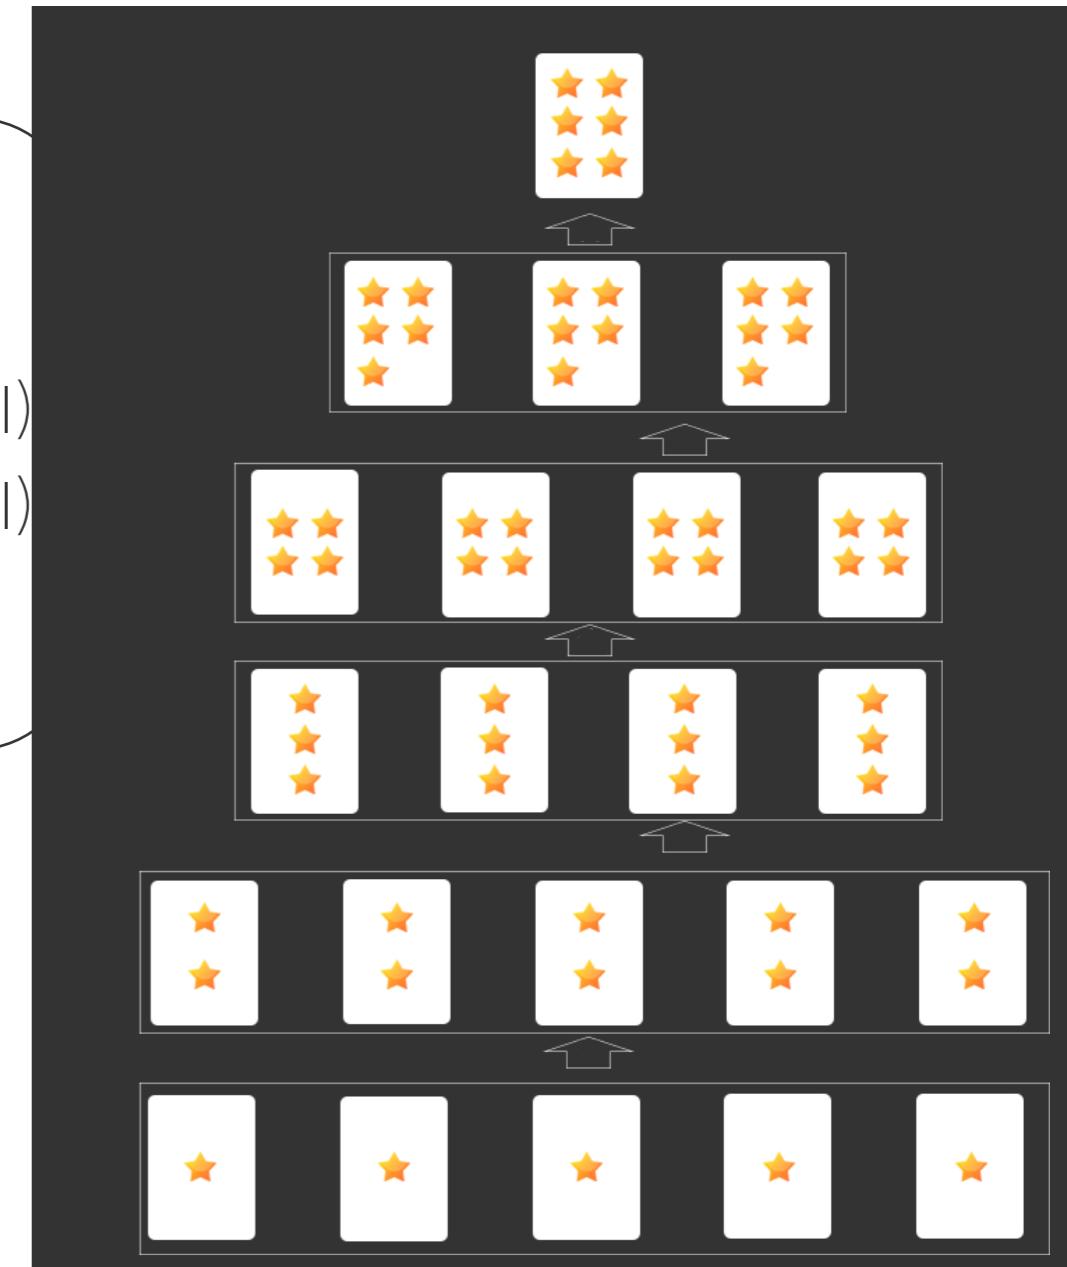

Game introduction

Card Synthesis:

- 2 star crafting cost: 5 1-star cards with 5,000 CKR +30NFS (for fuel)
- 3 star crafting cost: 5 2-star cards with 25,000 CKR +30NFS (for fuel)
- 4 star crafting cost: 4 cards of the same type with 3 stars and 50,000 CKR +30NFS (for fuel)
- 5 star crafting cost: 4 cards of the same type with 4 stars and 75,000 CKR +30NFS (for fuel)
- 6 star crafting cost: 3 5-star cards with 100,000 CKR +30NFS (for fuel)

CKR (Chakra) : The experience required to upgrade.

How to get CKR (Chakra) : CKR can be acquired through grinding PVP battles and PVE games. As you level up you also gain more chakras, since the need for CKR also increases.

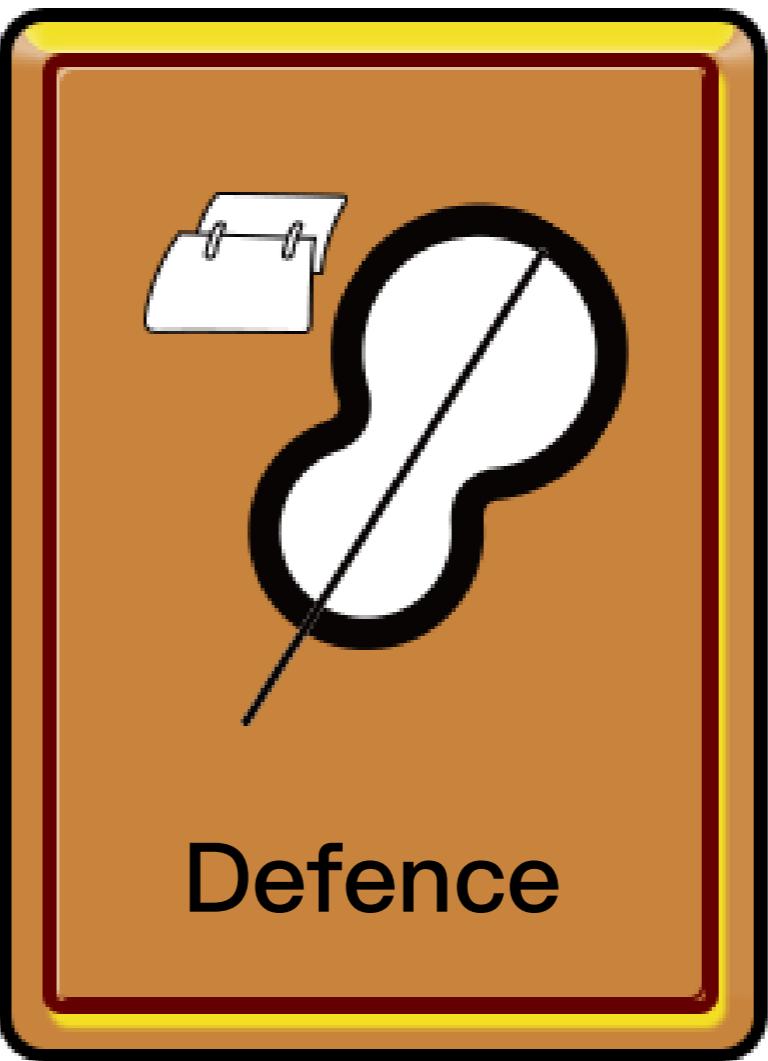

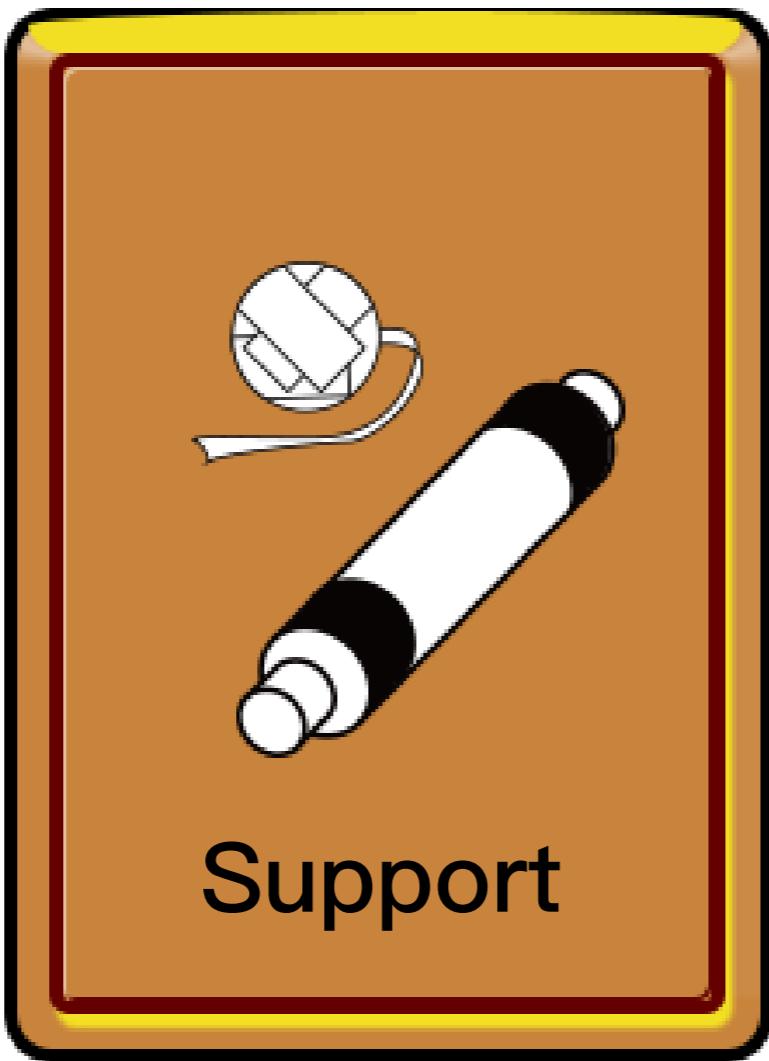

The Road to Ninja

Game introduction

Copyright N.Fans all rights reserved

Card classes are divided into combat cards, support cards and defense cards

For example: Naruto, Sasuke and Kakashi fall under the category of combat cards, and thus possess strong attack power and fast attack speeds. Support system attributes include team health regeneration, removing control and enabling positive buffs. Defense cards possess strong defensive attributes and a controlling force. As the level of the card increases, so does every attribute of the corresponding character.

Pocket Master 3D

Game introduction

- True to the original Pokemon IP, 3D image, animation, and voice dubbing.
- Using the same capture technology and method, the version Q upgrade is rendered on this basis, and is more suitable for younger users.
- A full set of 3D art characters and scenes, and 2D picture effects as seen in similar games. Advanced optimization technology programs can ensure that the final game size is less than 150Mb.
- Join the Pokemon BOSS battle, and compete with other players for the in-game BOSS.

Pocket Master 3D

Game introduction

Bursting bombs

—Capture explosive bombs, turn them into weapons, and throw them out. Can be used to capture Pokemon.

Pikachu

—Capturing Pikachu releases 100,000 volts of lightning, and can hit any other Pokemon in the scene.

Gengar (ghost)

—Capture Gengar (ghost) and generate a dark vortex on the spot, affecting other Pokemon as they pass by.

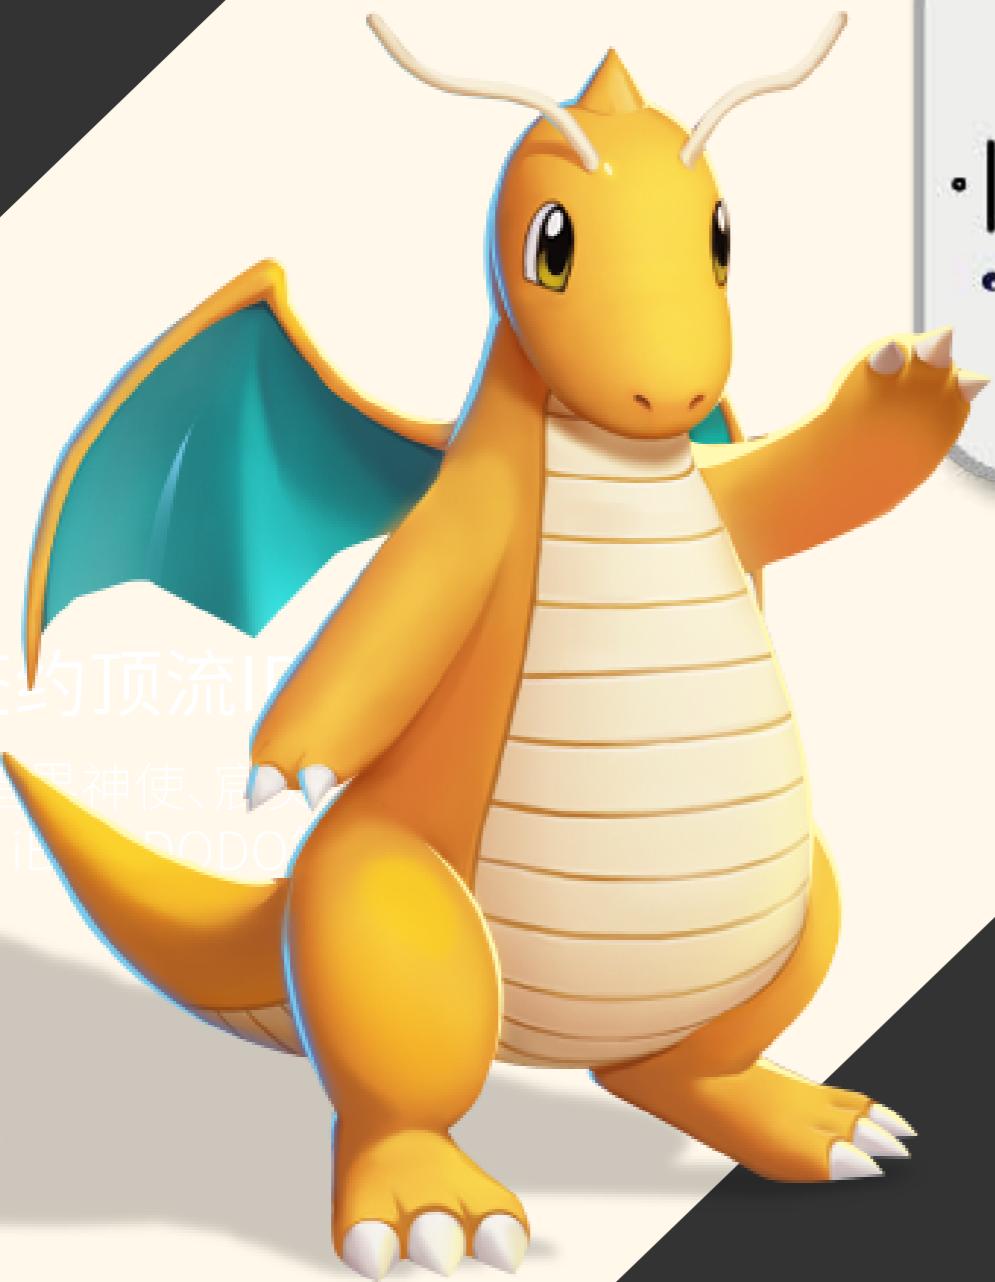

Pocket Master 3D

Game introduction

Fast Dragon (BOSS)

—The maximum bonus multiplier can be up to x4000.

Super Dream (BOSS)

—The maximum bonus multiple can be up to X5000.

Token Mechanism

NFS is the equity certificate of the N.Fans platform. The holder will have the rights and interests of platform dividends, community governance and voting, purchase of NFT products, priority participation in activities, and mining. The N.Fans platform promises to release 100% of the platform transaction fee surplus, and use it to repurchase and destroy NFS (centralized destruction and release formulas released at the end of each month) until 100 million pieces remain to ensure the deflationary property of NFS. The N.Fans platform will use NFS as a value token to gradually improve platform functions and ecological content, thereby empowering participants and builders, and providing a safe and stable investment environment for all users.

Total NFS issuance: 200,000,000

- Ecological mining incentive: 50%
- Token sales: 20% (lock-up)
- Reservation: 15% (lock-up)
- Advisors: 10% (lock-up)
- Partners/Users: 5% (lock-up)

Token and NFT sales purposes

Development Route

2021 Q1

N.Fans officially approves the project and obtains investment
Obtains many well-known artists such as Hatano Yui to join
Sees well-known institutions and listed companies participate in the cornerstone investment

2021 Q2

Signs a top streaming IP to release NFTs
Signs Naruto, Anjie Shenshi, The Spirit, etc
Publishes NFTs on Binance NFT, iBox, DODO, etc

2021 Q4

N.Fans' self-operated NFT platform and its first game launches
N.Fans opens the beta and launches its first game, Ninja Raiders League
N.Fans releases its second online game, Ninja Path

2021 Q3

IDO was planned to launch along with the opening of a liquidity pool
IDO launches on DODO and opens the liquidity pool, sees an increase of up to 73% on the first day
Cooperation with capital, media, community and KOLs to establish a joint voice and empower all

2022 Q1

Expand the ecosystem of the meta-universe
Continue to sign more famous animation IPs such as One Piece, Gundam, Slam Dunk, Pokemon, etc
Provide more interactive NFT gameplay

2022 Q2

Update for N.Fans' platform and game version
Update includes more features and adds new gameplay
